Eni on a roll with early start-up of Ghana OCTP block

Eni has started production from its Offshore Cape Three Points (OCTP) integrated oil and gas development off Ghana's western coast this weekend, three months ahead of schedule.

The project will produce up to 85,000 barrels of oil equivalent per day (boepd) from 18 underwater wells, via the John Agyekum Kufuor floating production, storage and offloading unit (FPSO).
