Michel Ingenbleek, vice president of energy, CGI: “With blockchain, greenwashing is out of the equation”

Providing transparent and reliable accounting of carbon emissions and their reduction might be the next innovative use for blockchain technology in the energy industry, Michel Ingenbleek, vice president of energy at Canadian IT consultancy CGI, tells Gas Matters.

Energy companies are faced with the growing challenge of how to correctly account for and certify emissions.

While pressure to decarbonise operations grows, discrepancies and differences between estimates may make reports on emissions difficult to interpret.
