‘LNG has to act as a visible bridge to biogas’: IKEA

Global furniture giant IKEA is determined to become a “climate-positive” company, Elisabeth Munck af Rosenschold, sustainability manager, IKEA Supply Chain Operations, tells LNG Business Review in this exclusive interview. To achieve this the company advocates the wider adoption of biofuels, including bio-LNG, in its value chain, while championing a sustainability approach in logistics that revolves around “reduce, replace, rethink” – described by Munck af Rosenschold as “the three r’s”. When it comes to LNG, Munck af Rosenschold says it has a role to play as a “bridge to biogas,” but because it is a fossil fuel, it has to be a bridge that is “visible and clear.”
