UK and European natural gas hubs roared back into life on Monday following weeks of record low pricing, as front-month NBP rose 14.7% to hit the equivalent of USD 1.96/MMBtu and Dutch TTF gained 14.4% to close at USD 1.92/MMBtu. These represent highs not seen since mid- and late-April 2020 for the month-ahead contracts on the UK and Dutch gas hubs, respectively. Prices rose after Slovakia's gas transportation system operator Eustream announced it is offering extra interruptible transmission capacity at the Velke Kapusany exit point towards Ukraine, which could tighten the supply-demand balance in western Europe. A compounding factor was a 7.7% rise in the EU carbon price, with ETS allowances (EUAs) closing yesterday at USD 26.55/tonne – a fresh six-month high.

Another key factor was a 14.3% spike in US gas benchmark Henry Hub (HH), which occurred partly as a result of the front month contract rolling over into August. The August contract itself gained more than 10% in yesterday's session to hit USD 1.71/MMBtu, which represents a 14.3% premium on Friday's final closing price for the July contract. But the main driver for the price rise was forecasted warmer weather driving US cooling demand, plus lower production expectations following the bankruptcy [2] of Chesapeake Energy.

Higher HH further undermines the economics of US LNG exports, which use HH to calculate feed gas prices. This fuelled speculation that US LNG cargo cancellations will be towards the higher end of the 35-45 cargo range, which would reduce the volumes of Atlantic basin supplies heading towards Europe and other markets.

Crude oil prices returned to growth on Monday, as global benchmark Brent and US benchmark WTI rose by 1.7% and 3.1% to close at USD 41.71/barrel and USD 39.70/barrel, respectively. Both benchmarks

were trading down by more than 1% on Tuesday morning.

Front-month futures and indexes at last close with day-on-day changes (click to enlarge):

Front-month futures/index	29/06/2020	26/06/2020	Daily +/- (\$)	Daily
Henry Hub (\$/MMBtu)	1.71	1.50	0.21	
NBP (\$/MMBtu)	1.96	1.72	0.24	
NBP (£p/th)	15.97	13.92	2.05	
Henry Hub-NBP spread	0.25	0.22	0.03	
TTF (\$/MMBtu)	1.92	1.68	0.25	
TTF (€/MWh)	5.84	5.11	0.73
