Brent crude leapt back into life yesterday to break through the psychologically significant threshold of USD 50/barrel, shaking off near-term concerns that depressed upward momentum in the previous two sluggish trading sessions. ICE Brent and WTI futures both rose 2.8% to close the session at USD 50.25/barrel and USD 46.78/barrel, respectively, representing highs not seen since the oil crash in early March. The gains were underpinned by sustained optimism over the global rollout of Sars-Cov-2 vaccines, even though widespread distribution is still many months away and the market is expected to remain oversupplied throughout the first three months of 2021 and potentially beyond.

The European carbon price notched up strong gains yesterday as EU leaders met to agree a more stringent bloc-wide 2030 carbon reduction target of 55%, compared to 40% previously. The front-month EUA futures contract rose 4% to EUR 30.90/tonne, setting a new 13-year high that is within touching distance of the all-time high of EUR 31/tonne. This price is expected to be surpassed before long as the EU Commission enacts policies to achieve the 2030 CO<sub>2</sub> target, with some analysts forecasting a price of EUR 90/tonne by the end of the decade.

Natural gas prices also made strong gains yesterday as northern hemisphere economies brace for a cold winter. European gas hubs NBP and TTF rose 6.6% and 5.5%, respectively, to close at the equivalent of USD 6/MMBtu and USD 5.52/MMBtu – prices not seen since early 2019. The gains were supported by a 4.5% uptick in Henry Hub to USD 2.55/MMBtu, which increasingly drives global prices amid record output from US LNG export facilities.

Meanwhile, the Asian spot LNG bull run shows no signs of abating, with the JKM price this week breaching USD 10/MMBtu for February-dated cargoes. CME's JKM futures contract, a financial

instrument used to bet on the future JKM price, yesterday gained 1.2% to close at USD 7.92/MMBtu for January cargoes, while the February contract soared by 7% to close at USD 9.20/MMBtu.
