To the polls: Bumper election year could shake up global energy landscape

2024 will be a bumper year for elections globally, as billions of people eligible to vote will head to the polls against the backdrop of geopolitical conflicts, rising energy costs and growing climate change anxiety. With all these topics at the forefront of political debates, there are concerns that far-right movements pushing for a U-turn in decarbonisation commitments could end up having a bigger say, if not gain power, in many countries around the world.
