Interview with Kathleen Eisbrenner, CEO of Pangea LNG

Floating liquefied natural gas (FLNG) is seen by many as a new game-changer for the LNG industry (see cover article). Three FLNG ships are currently under construction, and a further 16 are under development – eight of which are planned for the US. LNG Business Review talks to Kathleen Eisbrenner, CEO of Pangea LNG, and learns about the competitiveness of FLNG alongside other export projects in the US, the latest developments in Pangea LNG's three FLNG projects, how the drive for economies of scale and mega projects has created a space for smaller-scale projects, and what are the next big risks/opportunities.
