Shell's huge Pearl project looks forward to lucrative GTL production

If Shell's gigantic gas-to-liquids plant in Qatar works as planned – and the smart money is betting it will – Pearl GTL will make a surprisingly large contribution to the company's global hydrocarbons production, and its cash flow. A success with Pearl would also transform prospects for the GTL industry, which has otherwise had a disappointing decade. Gas Matters visited the plant to see how commissioning is progressing, and for an exclusive interview with Shell's Executive Vice President, Andy Brown.
